

# Le Sueur Energy Park Community Update

The Minnesota Municipal Power Agency (MMPA) supplies the electricity needs of its eleven Minnesota members –

- |              |                   |                     |
|--------------|-------------------|---------------------|
| 1. Anoka     | 2. Arlington      | 3. Brownton         |
| 4. Buffalo   | 5. Chaska         | 6. East Grand Forks |
| 7. Le Sueur  | 8. North St. Paul | 9. Olivia           |
| 10. Shakopee | 11. Winthrop      |                     |

The Minnesota Municipal Power Agency is committed to providing our 11 member communities with competitively priced, reliable and sustainable energy. At Le Sueur Energy Park, MMPA will create renewable energy, including electricity, biogas and fuel pellets, from agricultural waste. As a community-based Agency we realize that one of the most logical questions citizens could ask of a facility coming to town is, “What’s in it for us?” To answer this question, here are some economic benefits of the project.

## Employment

- The project will supply 100 construction jobs.
- There will be 10 permanent jobs at the facility.

## Stimulate New Development

- The facility will be an important anchor tenant for the industrial park.
- Le Sueur Energy Park will increase the city’s industrial tax base.
- The facility will attract additional tax-paying businesses to the industrial park.

Through your utility, MMPA is already a part of Le Sueur. We will continue to work hard to be a good neighbor and look forward to becoming a bigger part of the Le Sueur Community. Learn more at: <http://www.mmpa.org/Renewable-Energy/Le-Sueur-Energy-Park.aspx>.
