

Le Sueur Energy Park Community Update

Energy Conservation in Le Sueur

In addition to the Le Sueur Energy Park biomass project, MMPA has multiple renewable energy projects under development, including wind farms. Each project has been selected to meet Minnesota's Renewable Energy Portfolio Standard requirements, but more importantly, each project will be developed to meet MMPA's commitment to provide low cost electricity to its member communities at a stable price.

In addition to MMPA's efforts to provide competitively priced electricity, the Agency encourages customers to conserve energy at home and at work to save energy and money. Our "We Save Home" and "We Save Business" programs offer Le Sueur residents and business owners rebates and conservation programs for :

WeSaveHome

- Compact Fluorescent Light (CFL) Bulbs
- Energy Star Qualified Appliances
- Q.I. Central AC / Air Source Heat Pump
- Central AC Tune-Up

WeSaveBusiness

- Lighting Retrofit
- New Construction Lighting
- Motor Efficiency
- Variable Frequency Drive
- Custom Projects

By participating in the We Save programs, customers earn rebates on energy-efficient, money-saving products. Through your conservation efforts, you can help the environment by reducing emissions from power production.

Rebate requests are processed on a "first-come first-served" basis. MMPA encourages customers to check with the Le Sueur Utilities Department to determine rebates and funds available.

To participate in MMPA's We Save program visit <http://mmpa.org/Our-Communities/Le-Sueur.aspx> or contact the Le Sueur Utilities Department for more information.
