

# Minnesota Municipal Power Agency Community Update

## Oak Glen Wind Farm

This month the Minnesota Municipal Power Agency celebrates the ground breaking of the Oak Glen Wind Farm. The project, which was announced in 2008, is about three miles northwest of Blooming Prairie.

Over the summer, 24 wind turbines will be installed in the project area. This 44 MW wind project in Steele County, MN is scheduled to be operational by the end of the year.

MMPA is committed to producing local and sustainable electricity for its member communities. In addition to the Oak Glen Wind Farm, development efforts continue for the Le Sueur BioPower facility. MMPA is evaluating potential project sites in the Le Sueur area and will continue to provide project updates to the Le Sueur community.
